OPHIR GOLD USA · CHRISTMAS 2026

Twenty Christmas rings: design brief and request for quotation

Prepared 2026-10-16 · 20 designs · each in 10K, 14K and 18K · yellow, white and rose · US 4–12 in half sizes

---

WHAT WE NEED FROM YOU, PER DESIGN

1. Confirm the design can be cast and finished solid, as drawn and described, at the stated dimensions. Tell us where you would change a dimension and why.
2. The finished weight in 14K at US 7. Our weights are geometric estimates and will be wrong by some margin; yours replace ours.
3. Your price for one finished piece in 14K yellow at US 7, labour included, and your rule for 10K, 18K and for other sizes.
4. Where a design carries a stone, the stone cost separately (stones named per page), and whether you supply or we do.
5. Lead time for a first sample of each design, and for a run of ten.

HOW TO READ THE PAGES

Each page is one design: the render, the construction in plain words, the story the listing tells the buyer, and the specification. The renders are design visualisations, not photographs of samples; **where the picture and the text differ, the text governs.** One render (R06) is marked as not yet matching its description.

All twenty are solid gold with no hollow sections, no plating on the white gold, and no engraving or personalisation. The two signets with cut motifs (R04, R05) carry the motif only; no lettering.

INDEX

CODE	DESIGN	GROUP	DIMENSIONS	EST. G 14K US 7	STONES
R01	Ribbon Bow Ring	Bow & ribbon	9 mm bow, 2 mm band	3.32	–
R02	Velvet Knot Ring	Bow & ribbon	11 mm knot, 2.4 mm band	4.73	–
R03	Ribbon Wave Ring	Bow & ribbon	2.6 mm band, 6 mm rise	3.32	–
R04	Fir Crest Signet Ring	Signet	10.5 mm oval face	8.61	–
R05	Nordic Knot Signet Ring	Signet	10 mm square face	8.65	–
R06	Snowdrift Pinky Signet	Signet	8 mm face, pinky	6.84	–
R07	Frost Dome Ring	Dome	9 mm dome, 3.4 mm high	10.75	–
R08	Snow Globe Dome Ring	Dome	9.5 mm dome, 3.8 mm high	12.15	–
R09	Pinecone Dome Ring	Dome	9 mm dome, 3.6 mm high	11.19	–
R10	Winterberry Stack Ring	Stacking	1.5 mm band, 3 mm berries	2.79	–
R11	Fairy Light Stack Ring	Stacking	1.6 mm band, 7 stones	1.97	7
R12	Garland Twist Ring	Stacking	1.8 mm twisted band	2.58	–
R13	Cranberry Bezel Ring	Coloured stone	4 mm stone, 2 mm band	2.70	1
R14	Evergreen Bezel Ring	Coloured stone	4 mm stone, 2 mm band	2.70	1
R15	Toi et Moi Winter Ring	Coloured stone	two 4 mm stones	2.74	2
R16	Winter Rose Ring	Coloured stone	10 mm rose head	4.41	1
R17	Icicle Point Ring	Winter	2.2 mm band, 8 mm points	3.31	–
R18	Fir Sprig Ring	Winter	2 mm band, 14 mm sprig	2.93	–
R19	Reindeer Antler Ring	Winter	2 mm band, 12 mm antlers	3.16	–
R20	Wreath Ring	Winter	full circle of leaves	4.15	–

Weights are our estimates from the drawn geometry; the dome and signet weights use a simple top-and-shank average. They are here only so your figures have something to be compared with.

R01 Ribbon Bow Ring

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A flat gold ribbon tied in a small bow across the top of the finger.

The band widens into a flat ribbon at the top, crosses itself once and pulls through, so two loops stand slightly proud and two tails run back down the shank.

STORY

The band widens into a ribbon as it reaches the top, crosses itself once and pulls through, so the two loops stand slightly proud and the two tails run back down the shank. The gold is polished all over, which is what makes it read as ribbon rather than as metal.

SPECIFICATION

Dimensions	9 mm bow, 2 mm band
Size	the bow is about 9 mm across and the band is 2 mm wide.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	3.32 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R02 Velvet Knot Ring

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A wide soft knot, the ribbon doubled over and pulled through itself.

The band doubles, folds and passes under itself at the top, so the knot sits as one rounded mass with a deep shadow where it tucks.

STORY

Where a bow has loops this has volume: the band doubles, folds and passes under, so the knot sits as one rounded mass with a deep shadow where it tucks. It is the heaviest of the three ribbon designs and the one that reads from across a room.

SPECIFICATION

Dimensions	11 mm knot, 2.4 mm band
Size	the knot stands about 11 mm across the top, the band is 2.4 mm wide.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	4.73 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R03 Ribbon Wave Ring

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A flat band folded into one standing wave, like ribbon caught mid curl.

The band is flat and even the whole way round, then lifts into a single standing curl at the top of the finger and settles again.

STORY

The band stays flat and even the whole way round, then lifts into a single curl at the top of the finger and settles again. Nothing is added to it: the whole design is one piece of gold persuaded into a curve.

SPECIFICATION

Dimensions	2.6 mm band, 6 mm rise
Size	the band is 2.6 mm wide and the wave rises about 6 mm.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	3.32 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R04 Fir Crest Signet Ring

SIGNET

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

An oval signet with a single fir sprig cut into the face.

The face is a clean polished oval with a single fir sprig cut down into it, and the shoulders swell smoothly into the face.

STORY

The face is a clean polished oval and the sprig is cut into it rather than raised on it, so the ring keeps a flat silhouette and the needles catch light only when the hand turns. The shoulders swell into the face so there is no join to feel.

SPECIFICATION

Dimensions	10.5 mm oval face
Size	the face is about 10.5 mm across and the shank narrows to 2.2 mm.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	8.61 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R05 Nordic Knot Signet Ring

SIGNET

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A squared signet carrying an interlaced Scandinavian knot.

The face is a soft cornered square carrying an interlaced knot that runs over and under itself, cut deep enough to hold a shadow.

STORY

The face is a soft cornered square and the knot runs over and under itself across it, cut deep enough to hold a shadow. It is the quietest Christmas reference in the line and the one that stays on the hand in January.

SPECIFICATION

Dimensions	10 mm square face
Size	the face is about 10 mm across and the shank narrows to 2.4 mm.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	8.65 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R06 Snowdrift Pinky Signet

SIGNET

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A small pinky signet whose top is a drifted, wind shaped mound instead of a flat face.

The top is a small solid mound of gold with no flat plate anywhere: it rises high on one side and slopes smoothly down into the band on the other, scaled small for the little finger.

STORY

Where a signet would carry a flat plate this one carries a low drift of gold, the way snow banks against a wall. Scaled for the little finger, which is where a signet is worn now.

SPECIFICATION

Dimensions	8 mm face, pinky
Size	the top is about 8 mm across, cut for the little finger.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	6.84 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R07 Frost Dome Ring

DOME

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A high gold dome worked all over with a fine frosted texture.

The dome is full and round and its whole surface is broken into a close fine frost texture.

STORY

The dome is full and round and the whole surface is broken into a close frost, so it holds a soft light instead of a hard highlight. Against a polished stacking band the contrast is the point.

SPECIFICATION

Dimensions	9 mm dome, 3.4 mm high
Size	the dome is about 9 mm across and stands 3.4 mm above the finger.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	10.75 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R08 Snow Globe Dome Ring

DOME

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A tall smooth polished dome with nothing on it at all.

The dome is tall, smooth and mirror polished, with nothing on its surface at all.

STORY

The largest and plainest piece in the line: one clean curve of gold, mirror polished, catching the room the way a glass globe does. Everything it has is in the shape.

SPECIFICATION

Dimensions	9.5 mm dome, 3.8 mm high
Size	the dome is about 9.5 mm across and stands 3.8 mm above the finger.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	12.15 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R09 Pinecone Dome Ring

DOME

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A dome built from overlapping pinecone scales.

The dome rises out of the band itself, the band widening into it, and is built from overlapping pinecone scales, each one cut and lifted so its edge stands away from the body.

STORY

Each scale is cut and lifted separately so they tile around the dome and the edges stand away from the body. It is the most worked surface in the line and the one that reads as winter without naming Christmas.

SPECIFICATION

Dimensions	9 mm dome, 3.6 mm high
Size	the dome is about 9 mm across and stands 3.6 mm above the finger.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	11.19 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R10 Winterberry Stack Ring

STACKING

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A thin band carrying a short run of round gold berries.

Five small solid gold spheres sit close together over the top of the finger and the rest of the thin band stays plain.

STORY

Five small spheres sit close together over the top of the finger and the rest of the band stays plain, so it stacks against a plain band. The berries are solid gold, not set stones, which is what keeps it wearable every day.

SPECIFICATION

Dimensions	1.5 mm band, 3 mm berries
Size	the band is 1.5 mm wide and each berry is about 3 mm.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.79 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R11 Fairy Light Stack Ring

STACKING

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A thin band with small stones spaced along it like a string of lights.

Seven small stones are bezel set at even intervals across the top half of a thin band, each in its own small collar of gold, with plain gold between them and the back half of the band plain.

STORY

Seven white diamonds are bezel set at even intervals, each one sitting in its own small collar of gold so the line reads as lights on a wire rather than as pave. The gaps are as much of the design as the stones.

SPECIFICATION

Dimensions	1.6 mm band, 7 stones
Size	the band is 1.6 mm wide and carries seven stones.
Stones	seven small round brilliant white diamonds, bezel set.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	1.97 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R12 Garland Twist Ring

STACKING

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

Two fine wires twisted together the whole way round, like a garland.

Two fine wires are twisted together evenly the whole way round, with a groove of shadow running between them.

STORY

The twist is even from end to end with no join to find, and the grooves between the wires hold a darker line of shadow that makes the gold look deeper than it is. It is the oldest idea in the line and the easiest to wear.

SPECIFICATION

Dimensions	1.8 mm twisted band
Size	the twisted band is 1.8 mm wide.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.58 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R13 Cranberry Bezel Ring

COLOURED STONE

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

One deep red garnet held in a rub over bezel on a plain gold band.

One round stone sits low in a smooth rub over bezel with no claws, on an otherwise plain band.

STORY

The bezel is a smooth collar of gold with no claws, so nothing catches and the stone sits low and dark against the metal. Red on gold is the oldest Christmas pairing there is, and this is the quiet version of it.

SPECIFICATION

Dimensions	4 mm stone, 2 mm band
Size	the stone is about 4 mm and the band is 2 mm wide.
Stone	one round deep red garnet, rub over bezel set.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.70 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R14

Evergreen Bezel Ring

COLOURED STONE

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

One deep green tourmaline held in a rub over bezel on a plain gold band.

One round stone sits low in a smooth rub over bezel with no claws, on an otherwise plain band.

STORY

The twin of the cranberry ring and made to be worn with it. The green reads almost black until light passes through it, which is exactly how a tree looks across a room.

SPECIFICATION

Dimensions	4 mm stone, 2 mm band
Size	the stone is about 4 mm and the band is 2 mm wide.
Stone	one round deep green tourmaline, rub over bezel set.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.70 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R15 Toi et Moi Winter Ring

COLOURED STONE

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A red stone and a green stone side by side on a bypass shank.

The band splits before the top and the two ends pass each other, each carrying one bezel set stone, so the two stones sit shoulder to shoulder rather than in a row.

STORY

The band splits before the top and the two ends pass each other, each carrying one bezel set stone, so the garnet and the tourmaline sit shoulder to shoulder rather than in a row. Two stones, two people, which is the whole idea of the setting.

SPECIFICATION

Dimensions	two 4 mm stones
Size	each stone is about 4 mm on a 1.9 mm bypass band.
Stones	one deep red garnet and one deep green tourmaline, both bezel set.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.74 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R16 Winter Rose Ring

COLOURED STONE

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A single sculpted rose head with one small white diamond at its centre.

The petals are cut separately and folded in towards the middle, tight at the heart and opening at the edge, with one small stone set in a tiny bezel at the centre.

STORY

The petals are cut separately and folded in towards the middle, tight at the heart and opening at the edge, with one stone where the bud has not yet opened. A winter rose rather than a summer one: heavy, closed and gold.

SPECIFICATION

Dimensions	10 mm rose head
Size	the rose head is about 10 mm across on a 2 mm band.
Stone	one small round brilliant white diamond at the centre.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	4.41 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R17 Icicle Point Ring

WINTER

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

Tapering icicle points rising from the top of the band.

Five tapering points of different lengths rise from the top of the band in the plane of the ring, standing close together and each ending in a fine tip, with the rest of the band plain.

STORY

Icicles turned the right way up for a hand: the points stand off the top of the finger, so the ring has a plain line below and a broken, frozen one above. They are solid gold, rounded at the base so nothing catches, and fine only at the very tip.

SPECIFICATION

Dimensions	2.2 mm band, 8 mm points
Size	the band is 2.2 mm wide and the tallest point rises about 8 mm.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	3.31 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

Fir Sprig Ring

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A fir sprig laid along the band with every needle raised.

A fir sprig lies along the curve of the band, needles raised away from the gold on both sides of a central stem.

STORY

The sprig follows the curve of the finger rather than sitting across it, so the ring stays low and the needles stand away from the gold on both sides of a central stem. It reads as a branch, not as a tree.

SPECIFICATION

Dimensions	2 mm band, 14 mm sprig
Size	the sprig runs about 14 mm along a 2 mm band.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	2.93 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R19 Reindeer Antler Ring

WINTER

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

Two antler forks crossing in a bypass over the finger.

Each end of the band grows into a forked antler and the two pass each other without touching, leaving a visible gap.

STORY

Each end of the band grows into a forked antler and the two pass without touching, leaving a gap you can see through. The forks are rounded rather than sharp so they sit against the next finger comfortably.

SPECIFICATION

Dimensions	2 mm band, 12 mm antlers
Size	the antlers span about 12 mm across a 2 mm bypass band.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	3.16 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.

R20 Wreath Ring

WINTER

Design render, 14K yellow gold shown. Not a photograph of a sample.

DESIGN

A full circle of overlapping gold leaves, a wreath sized for the finger.

Overlapping leaves run the whole way round with no plain section at the back, each one lapping the last in the same direction and all of them staying inside the 2.4 mm width of the band.

STORY

The leaves run the whole way round with no plain section at the back, each one overlapping the last in the same direction so the ring turns like a wreath hung on a door. It is the only piece in the line with no beginning and no end.

SPECIFICATION

Dimensions	full circle of leaves
Size	the leaf band is about 2.4 mm wide the whole way round.
Karats	10K, 14K, 18K
Colours	Yellow, white (unplated), rose
Sizes	US 4 to 12 in half sizes (17 sizes)
Est. weight	4.15 g in 14K at US 7 (our geometric estimate, not weighed; please correct)
Engraving	None. No personalisation on this line.
